

CD-132 Stud Welder

The experiment shows that for carbon steel, stainless steel, aluminum and other metal materials with plate thickness less than 2.5mm, and the CD studs that diameter below M8, can achieve best welding effect when use this CD-132 Stud Welder. For diameter M10 CD studs, can achieve best welding effect when the thickness of base metal is less than 1mm.

Technical parameters			
Model	CD-132	Charge Capacity	132,000uF
Welding Process	Contact or Cap	Power	800W
Welding Time	0.001 to 0.003 sec	Duty Cycle	Up to 30/min
Welding Range	M3-M10		
Dimensions	500mm x 300mm x 260mm	Weight	24KG

Optional matching welding gun
